INDULGE

INFUSE

Introducing a range of companion teas to be used with the INFUSE line of bottles. These yummy brews utilize a number of wholesome ingredients from the product specifics as part of the unique options of INFUSE's brand.

Our teas don't just taste and look good - they bring our customers a whole host of innovative, one of a kind, supplemental health benefits that haven't been seen anywhere else. Easily plugged on social media by Influencers, these teas are right on trend to reach a wide demographic through #adSponsorship at little to no cost. They come in single-serving, recyclable paper pouches for our eco-conscious Millennial demographic, and are loose-leaf, fair-trade, and 100% organic. This makes them the perfect fit for our uniquely shaped ball pod infuser. What's not to love?

Influencers from all niches enjoy free product samples in return for a #plug or #post, especially if they are happy with the product (-and they will be!). In a market that is saturated with the same old 'flat tummy teas', INFUSE's line stands out among the competition and is sure to attract a loyal online following that will lead to sales, and a future expansion of our range of specialty teas... and in turn, boost the sales of our Bottle and Pod Infuser.
